Education

DePaul University Mar 2025

MS in Information Systems, GPA: 3.8/4.0

- **Coursework:** IT Project Management, Database Design, Cloud Computing, Programming with Python

Experience

AI Engineer Intern - Carenodes | Feb 2026

- Built ingestion pipeline for structured extraction from legal contracts, reducing onboarding time by 30%.
- Designed rule-engine backend for fee schedules and pricing logic, improving processing efficiency by 40%.
- Developed JSON extraction system with source attribution across 10+ fields, improving accuracy.
- Implemented event-driven workflows with IDs and term computation, reducing review cycles by 25%.
- Deployed REST APIs and async pipelines, improving processing speed by 35%.

Software Engineer Intern - MyFutureSelf.Inc 🌐 | Nov 2025

- Architected a secure backend proxy, removing 100% of client-side API keys across 12+ production functions.
- Implemented RBAC and CORS in Firebase, securing 20+ production collections from unauthorized access.
- Redesigned Firestore rules to prevent privilege escalation, safeguarding sensitive user data.
- Migrated iOS LLM integrations to backend proxies, preserving conversation history for 1,000+ users.
- Fixed transactional rate limiting in Firestore, eliminating race conditions under concurrent load.

Projects

Dataweaver - AI Data Analyst 🌐 | Mar 2026

- Automated data insights using an AI platform for natural language queries, reducing analysis time by 70%.
- Discovered patterns via correlation, regression in Python, improving insights by 50%.
- Converted complex data into interactive visuals using Plotly.js, accelerating interpretation by 60%.
- Streamed real-time charts and findings with FastAPI and SSE, reducing response latency by 40%.
- Enabled conversational data exploration with session memory (Supabase), improving efficiency by 50%.

GEN-AI-PitchPal - Startup Pitch Builder 🌐 | Apr 2025

- Converted 20K-word briefs into slide decks with Gemini, LangChain and FAISS, cutting prep time by 95%.
- Automated slide creation with Notion API and python-pptx, reducing manual effort by 90%.
- Generated elevator pitches, nine-slide outlines and investor links with RAG, reducing manual edits by 70%.
- Engineered a Gemini Q&A simulator to produce three Q&A pairs, uncovering 80% of narrative gaps.
- Scaled deck production from 1 to 20 per day, doubling weekly investor meetings.

Skills

Languages and frameworks: Swift, JavaScript, Node.js, TypeScript, Python, Java, C, C++, SwiftUI, React.js, FastAPI, Unit Testing, CI/CD, R, OOP, System Design, Pytest, Agile, Scrum, Excel

Cloud & Databases: Firebase, GCP, SQL, MySQL, PostgreSQL, Supabase, Git, AWS, Docker

Data Science: TensorFlow, PyTorch, scikit-learn, OpenAI API, LLMs, ETL, Power BI, Tableau

Certifications

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate Oct 2025

5 day Gen AI Intensive - Kaggle Apr 2025
